

SUPERIOR TWIN F 84 RCG L2 4S

With an energy consumption of 1502 kWh/year (Energy test Ecodesign) the SUPERIOR TWIN F 84 ranks in energy class C according to new EU legislation that will be introduced 1st July 2016.

The Ecodesign test method records the 24 hour energy consumption and multiplies it by 365 to get the annual energy consumption (AEC). The 24 hour consumption is calculated from 2 test periods of 12 hours each. The first period has sequences of door openings while the second is a stabilization period with closed door.
