

# Banquet Master

## Electrolux AOS 201

Banquet Master is a roll-in-system with humidifier and convection heating up to 90°C. The box is designed to fit the roll-in rack from your combi oven. After cooking the food in your combi, you simply roll the rack directly into the hot holding cabinet. Our unique EOR system allows the roll-in rack to be lifted up and placed inside the Banquet Master, which allows for easy transport. Other features are adjustable ventilation for optimal moisture control, ergonomic push/pull handles in the back and big castors for easy movement. A ScanBox is a Scandinavian designed product made for both back and front of house, especially with the Signature option with the possibility to customize the exterior design.
